Washington, DC 20554

Dear The Federal Communications Commission,

I do not want to pay more for my telephone service! I urge you to reject a flat fee proposal that would change how contributions are made to the Universal Service Fund. The Universal Service Fund is basically corrupt and should be abolished. Under the flat fee proposal you are considering, people who make few long distance calls would pay the same as people or businesses that make many calls. In otherwords, adding to the tax corruption load. This is just shifting the burden on this tax to low-volume and primarily residential customers. I believe this proposal to be unjust and unfair!

I use my wireless phone for the safety of my wife when she is alone in her car and to support charities that we both serve. I don't want to lose the benefits we get and the support we give so that big businesses can pay less than their fair share. And believe me, we pay out of pocket to support these charities in donations of all kinds, including the gas we burn delivering meals-on-wheels. I urge you to reject the proposal to move the USF collection system to a flat-fee.

Keep the USF Fair!

Sincerely,

James McCarthy
